NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2007 AND 2006

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies of Ewing Capital, Inc. (the Company) are in accordance with accounting principles generally accepted in the United States of America and conform to general practices within the brokerage industry.

Revenue Recognition

Securities transactions and related commissions are recorded on a trade date basis. Investment banking revenue is recorded as follows: financial advisory and consulting fees as services are performed and underwriting fees at the time the underwriting is completed and income is reasonably determinable. The portion of commission revenues which represent commission reserves are recorded as an expense and liability at the same time the revenues are recognized.

Use of Estimates

The preparation of financial statements in conformity with general accepted accounting principles requires management to make estimates and assumptions. This will affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates.

Cash and Cash Equivalents

Cash and cash equivalents consisted of investments in money market mutual funds and cash on deposit with established federally insured financial institutions in checking, savings, and liquid investment accounts. Total cash on deposit at December 31, 2007, and during the years 2007 and 2006 exceeded the federal deposit insurance limits. The company has never experienced any losses in these accounts and does not believe that it is exposed to any significant concentration of credit risk. For purposes of the statement of cash flows, the Company considers all highly liquid instruments with original maturities of three months or less to be cash equivalents.

Marketable Securities

Marketable securities are valued at market value using published quotation sources. Unrealized gains or losses are included as a component of net income. All gains and losses on marketable securities are considered cash flows from operating activities for the purpose of the statement of cash flows.

Accounts Receivable

Accounts receivable represent amounts due from customers for services which include investment management and other financial consulting services, and amounts due from other brokers.
